UK-Based Panel of Leading Experts Publish Their Review of the Latest Research and Call for the Immediate Global Adoption of Ivermectin to Prevent and Treat COVID-19

WASHINGTON, D.C. – The Front Line COVID-19 Critical Care Alliance (FLCCC), a group of highly published, world-renowned critical care physicians and scholars, heralded a new call from the British Ivermectin Recommendation Development (BIRD) meeting that recommended the immediate adoption of Ivermectin for the prevention and treatment of COVID-19. A link to the proceedings document can be found on www.e-bmc.co.uk.

Convened by The Evidence-Based Medical Consultancy (E-BMC) in Bath, United Kingdom, the BIRD meeting was assembled according to the World Health Organization Handbook of Guideline Development to review the latest science on the safety and efficacy of Ivermectin for the treatment and prevention of COVID-19. The expert panel included medical and scientific experts from 16 countries, including Argentina, Australia, Belgium, Botswana, Canada, France, Hungary, India, Ireland, Japan, Peru, Nigeria, South Africa, The Philippines, United States, United Kingdom. Public and patient representatives were also present.

“This group is the latest in the growing number of experts from around the world who recognize Ivermectin’s role in fighting this pandemic,” said Dr. Pierre Kory, president and chief medical officer of the FLCCC. “The BIRD panel used the highest form of medical evidence, a meta-analysis, to evaluate data from over 20 trials of Ivermectin before concluding it’s safe and effective for use in treating COVID-19.”

“Compelling evidence exists as shown by this review, and clinicians in many countries are using Ivermectin and have reported on the positive results they have observed,” said Dr. Tess Lawrie, director of the Evidence-Based Medicine Consultancy. “It is troubling to think that

with every day that passes, the death toll of this pandemic grows when an effective treatment was, all along, right under our noses.”

The E-BMC shared the BIRD proceedings document and recommendation with officials at the World Health Organization, the U.S. National Institutes of Health, and the U.S. Food and Drug Administration.

About the Front Line COVID-19 Critical Care Alliance

The FLCCC Alliance was organized in March, 2020 by a group of highly published, world renowned Critical Care physician/scholars – with the academic support of allied physicians from around the world – to research and develop lifesaving protocols for the prevention and treatment of COVID-19 in all stages of illness. Their **MATH+ Hospital Treatment Protocol** – introduced in March, 2020, has saved tens of thousands of patients who were critically ill with COVID-19. Now, the FLCCC’s new **I-MASK+ Prophylaxis and Early At-Home Outpatient Treatment Protocol** with Ivermectin has been released – and is a potential solution to the global pandemic.
