

Ivermectin healed my neighbor with Long Haul Covid

My neighbor has been dealing with long haul for months. She was getting Vit C IV from her doctor and other things, but not feeling much better. Her doctor told her Ivermectin would not help her and it could cause problems. After watching Dr Been about Ivermectin and Long Haul, I told her it might be helpful and gave her info from Dr. Been's lectures and information from the FLCCC. She finally demanded her doctor prescribe Ivermectin. After a short time on it, her symptoms went away.

God Bless you for all you are doing!
