

FLCCC Year in Review

12-29-21

Overview:

- Global Health Ministries
- Ivermectin Prescriptions Decrease Cases & Deaths
- Use of ivermectin by Skilled Nursing Facilities

Global Health Ministry Programs:

Mexico City – The IMSS Health Agency compared over 50,000 patients treated early with ivermectin to over 70,000 not treated and found [up to a 75% reduction in need for hospitalization](#).

La Misiones, **Argentina** – Health Ministry just analyzed the first 800 of 4,000 ivermectin treated patients and compared to the rest of the population over the same time period, they found a [75% reduction in need for hospital](#) and an [88% reduction in death](#).

Uttar Pradesh, **India** – Used a strategy of [close surveillance combined with both ivermectin](#) treatment of all positive cases and preventive treatment of all family contacts. On September 10, 2021, [only 11 cases with no deaths were recorded in a population](#) of 241 million. As of August 31, of the previous 187,638 tests performed, only 21 were positive, an essentially zero positive rate or .01%.

Global Health Ministry Programs:

The **Brazilian** city of Itajai offered ivermectin as prevention to the entire city's population with 133,051 (60%) agreeing to take ivermectin every two weeks for 6 months. The city health service collected data on the entire population prospectively and found that Ivermectin users had a 70% lower mortality rate, and a 67% lower hospitalization rate while the citywide COVID mortality fell from 6.8% to 1.8% during the program.

La Pampas, **Argentina** – Health Ministry compared over 2,000 patients they treated early with ivermectin to over 12,000 without treatment and found that in patients over 40, rates of ICU admission and death both fell by 40%.

Global Health Ministry Programs:

Peru – A nationwide mass-distribution program called “[Mega-Operación Tayta](#)” (MOT), initiated at various times across 25 states of Peru in May 2020, led to a [74% drop](#) in regional excess deaths within a month, with *each drop* beginning 11 days after each MOT region’s varied start times

The Health Ministry of Sultan Kudarat in the **Philippines** launched an ivermectin drive and [found that cases rapidly dropped by 86%](#).

In **Japan**, the President of the Tokyo Medical Association recommended that all physicians start to use ivermectin as early treatment during their summer surge. They are now [recording the lowest rate of COVID hospitalization](#) in the pandemic.

FLCCC drove ivermectin prescriptions up.
