

**Senator Malcolm Roberts**  
One Nation Senator for Queensland

10 August 2023

American Board of Internal Medicine  
Suite 1700  
510 Walnut Street  
PHILADELPHIA PA 19106

Dear Members of the Board

**RE: DISCIPLINARY SANCTION – DR PIERRE KORY**

I write in support of Dr Pierre Kory, whom I understand you are proceeding to take disciplinary sanctions against.

Dr Kory is a highly qualified Doctor of Medicine and an internationally acclaimed author and researcher in the area of Covid-19 treatment protocols. He is recognised world-wide for his work in examining responses to the Covid-19 virus.

Dr Kory's research into the use of the anti-inflammatory drug, Ivermectin, as part of a treatment protocol for Covid-19 has led the world. Ivermectin has proven to be an effective treatment to reduce the transmission and severity of the disease, with no or minimal negative side effects.

Hundreds of millions of people have been treated with Ivermectin, and its efficacy and safety are confirmed. Ivermectin is now available for prescription in Australia, having been removed from the suspended list during the introduction of untested Pfizer and Moderna Covid injections that many experts consider failures in terms of efficacy and safety. Hundreds of millions of patients around the world have successfully used Ivermectin thereby justifying Dr Kory's position, statements, and work.

Many leading health practitioners in Australia are alarmed that the ABIM would consider applying disciplinary action against Dr Kory, who had the gumption to challenge protocols offering less effective outcomes in conjunction with far higher risk profiles. Dr Kory has demonstrated care for patients, competence, integrity, and courage.

I respectfully request that ABIM reconsider imposing any disciplinary sanction on Dr Kory for exercising his right to freedom of speech and offering his views based on extensive independent research and his deep knowledge acquired through the exercise of his profession.

Dr Kory and his work are respected globally. He has appeared and testified as a witness at two multi-party inquiries I organised and chaired for Senators in Australia.

His medical advice and care saved many lives and give hope to patients and medical professionals.

Yours faithfully

A handwritten signature in blue ink, appearing to read 'M Roberts'.

**Malcolm Roberts**  
Senator for Queensland
