

What is Sepsis?

FLCCC
ALLIANCE

**Sepsis is a global health crisis.
There are around 50 million cases
per year and 1 in 5 deaths are
associated with sepsis.**

FLCCC
ALLIANCE

**Sepsis is caused by an infection that
has spread inside the body.
It causes severe illness.**

FLCCC
ALLIANCE

Infections that lead to sepsis most often begin in the lung, skin, urinary tract, or gastrointestinal tract.

FLCCC
ALLIANCE

The image is a composite of two photographs. The top photograph shows a close-up of medical equipment, including a clear plastic drip chamber and a white corrugated tube, with a white gauze pad and a blue sutured wound visible. The bottom photograph shows a patient's arm in a white cast, with a clear plastic tube connected to it. The text is overlaid on a teal background that spans across both images.

If sepsis is left untreated, it can cause organ failure, tissue damage, and even death.

FLCCC
ALLIANCE

IMPORTANT:

When you are diagnosed with sepsis, treatment must start immediately.

FLCCCC
ALLIANCE

Treatment success is directly related to how soon treatment begins.

FLCCC
ALLIANCE

A healthcare professional, likely a nurse or doctor, wearing a white lab coat and glasses, is shown in a clinical setting. She is focused on examining a patient's arm, which is extended towards her. The background is slightly blurred, showing what appears to be a hospital or clinic environment. A teal semi-transparent banner is overlaid across the middle of the image, containing white text.

The origin of the infection should be diagnosed and treated, along with the inflammation causing the sepsis.

The FLCCC Sepsis Outpatient Treatment MCAZ+ Protocol:

- **M: melatonin**
- **C: vitamin C**
- **A: antibiotics**
- **Z: zinc**
- **+: Other supplements:**
 - **1. quercetin**
 - **2. curcumin**
 - **3. probiotics**

Melatonin

10 mg at night

FLCCC
ALLIANCE

Vitamin C

**1 gram by mouth,
6 times a day for 2 weeks**

FLCCC
ALLIANCE

A woman with blonde hair, wearing a light pink tank top, is shown in profile drinking from a white plastic water bottle. The background is a bright, sunny outdoor setting. A teal semi-transparent banner is overlaid across the middle of the image.

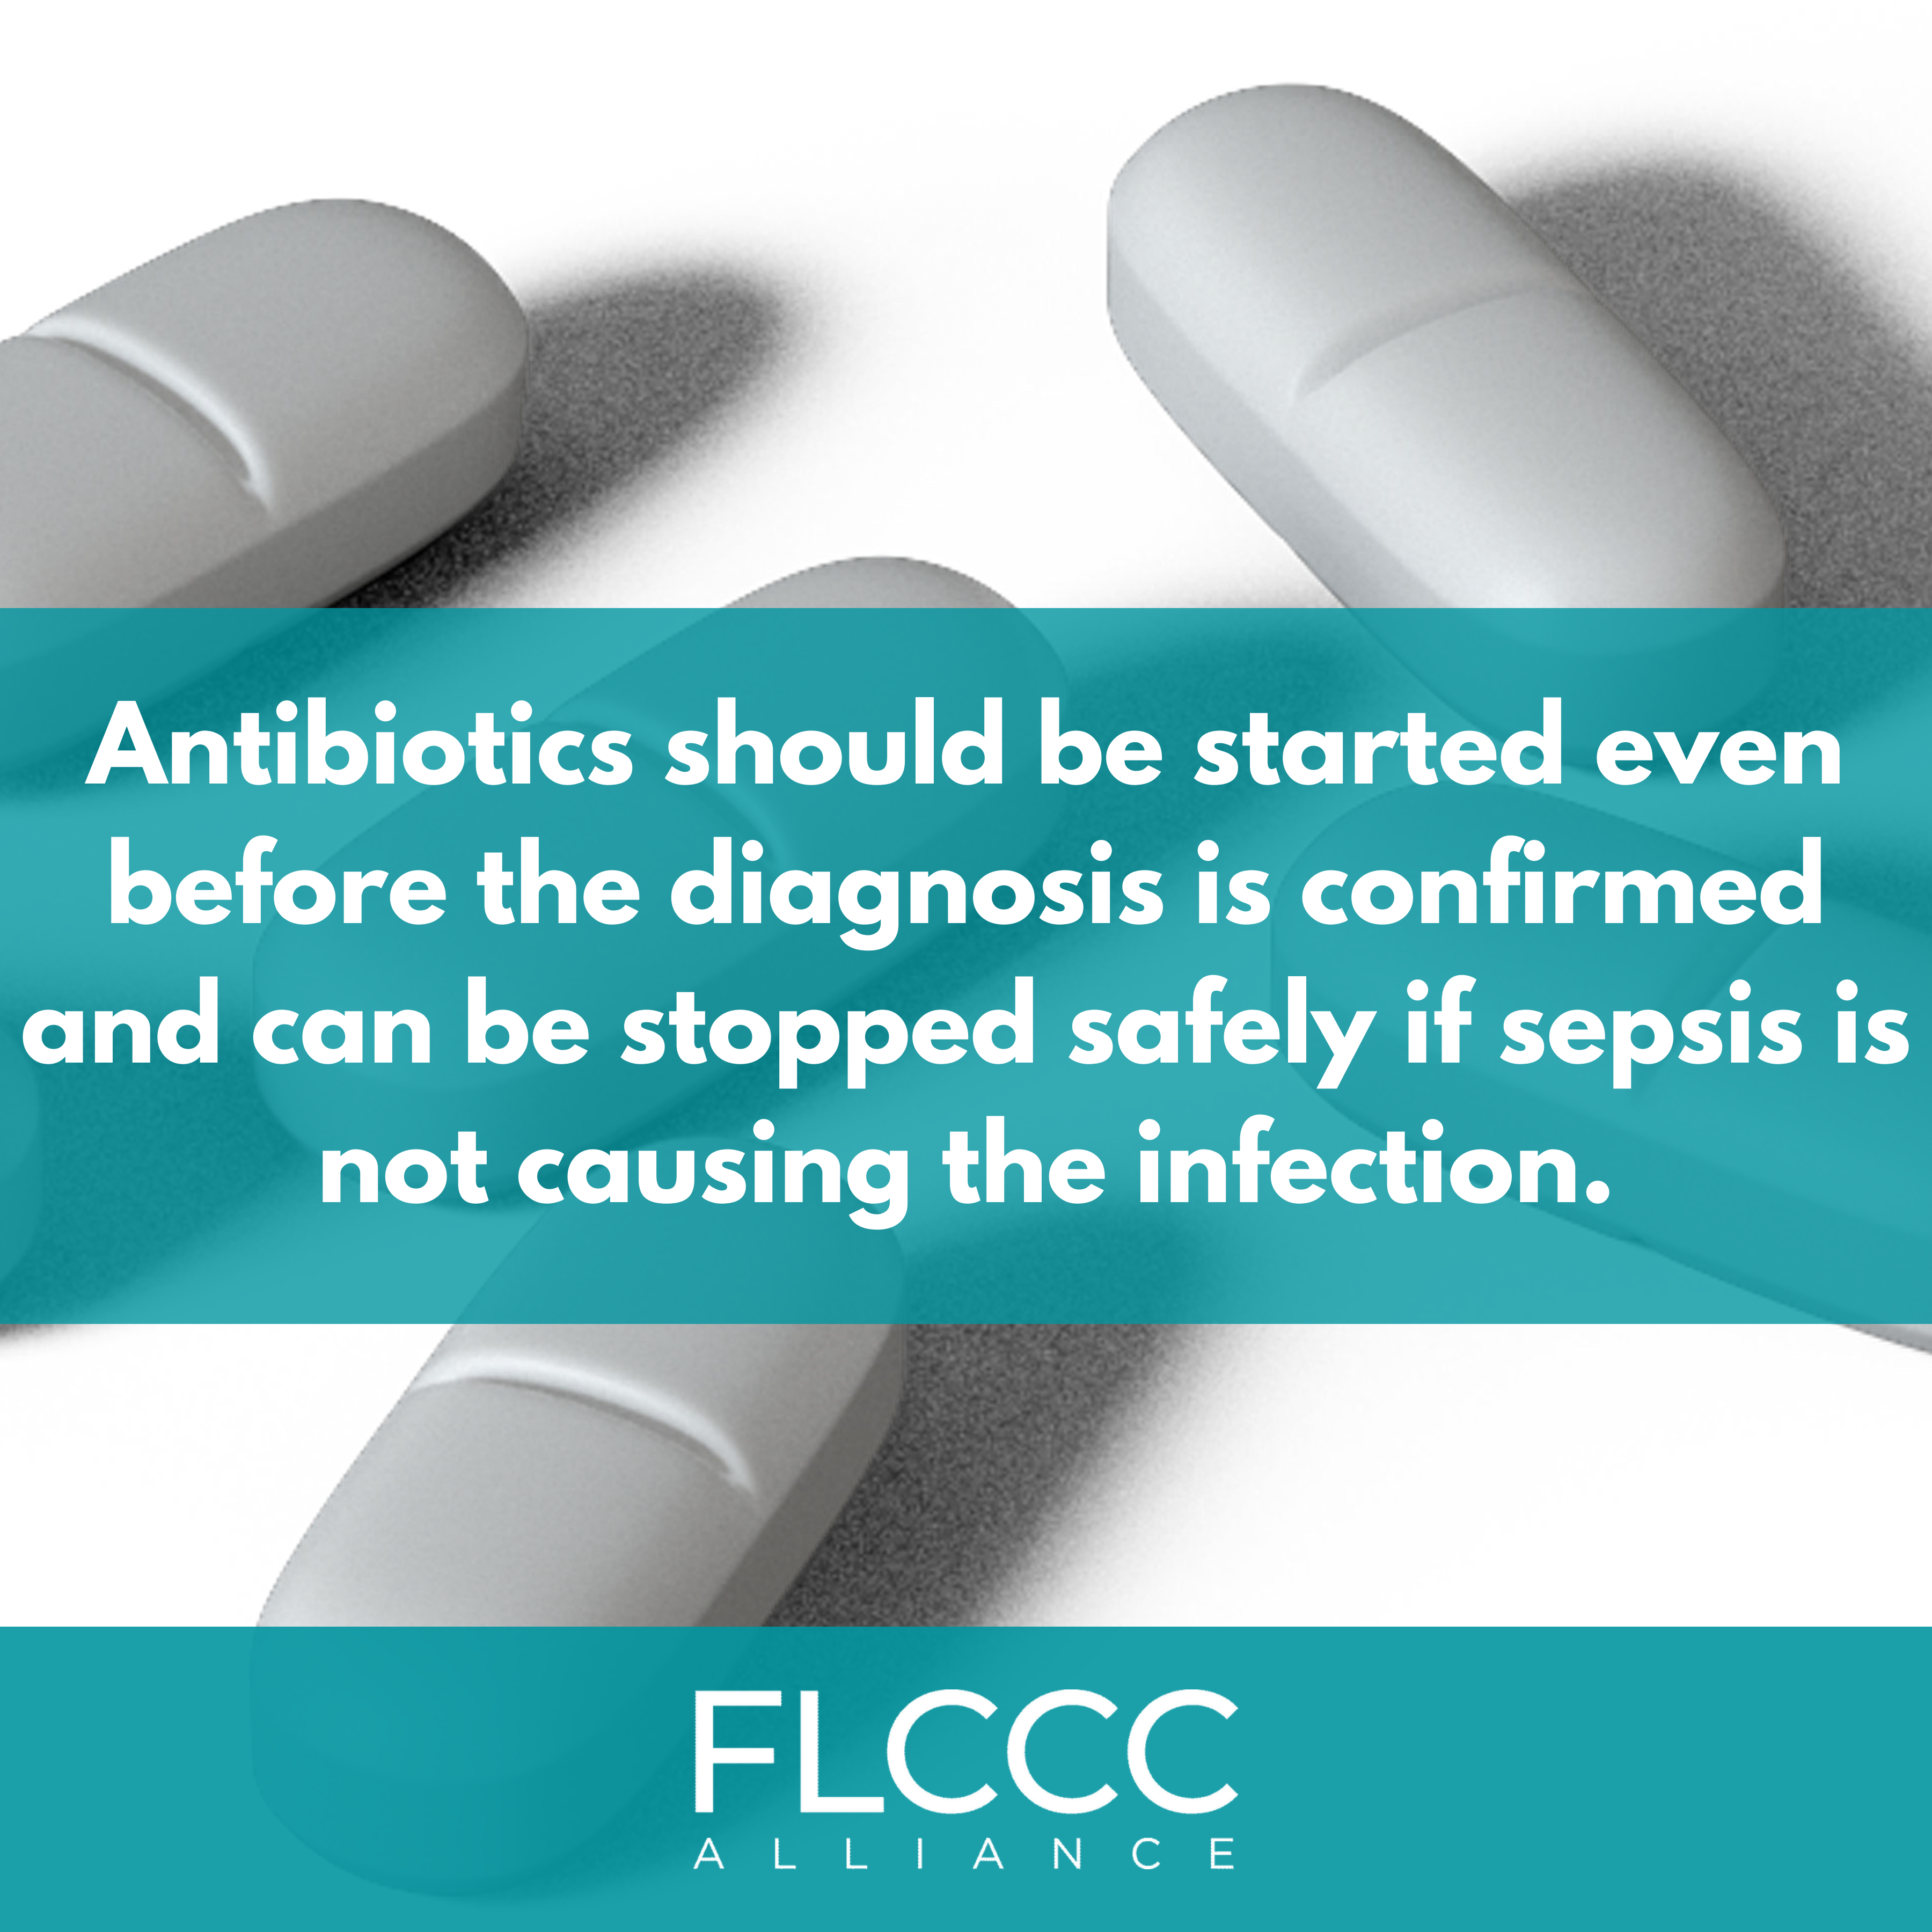

Stay well hydrated!

Antibiotics

**The infection must be treated
to cure sepsis.**

FLCCC
ALLIANCE

The background of the slide features three white, oval-shaped pills scattered on a white surface. The pills are slightly out of focus, with soft shadows cast beneath them. A teal-colored horizontal band is overlaid across the middle of the image, containing white text. Another teal band is at the bottom, containing the logo for the FLCCC Alliance.

Antibiotics should be started even before the diagnosis is confirmed and can be stopped safely if sepsis is not causing the infection.

Certain labs should be checked to determine whether the inflammation is infection.

These include: blood cell count (CBC), white blood cell count, and procalcitonin (PCT).

Zinc

**Zinc: 75-100 mg per day,
for no more than 2 weeks**

FLCCCC
ALLIANCE

Other Supplements:

Quercetin, Curcumin,
and Probiotics

FLCCC
ALLIANCE

Quercetin

**500 mg 2 times per day
for 2 weeks**

FLCCC
ALLIANCE

Curcumin

500 mg 2 times per day

FLCCC
ALLIANCE

Probiotics

PROBIOTICS

Probiotics containing
bifidobacterium one time per day
